

Brain-Based Design and Facilitation[®]

Workshop Overview

WHAT TO EXPECT

Workshop Focus

The Science of Learning

- Explore the neuroscience behind how we absorb and retain knowledge.

Social Learning in Practice

- Learn to design experiences that foster collaboration and shared insight.

Designing for Impact

- Master the principles of creating high-impact virtual, in-person, and blended learning.

Practical Application

- Participate in hands-on session to refine your skills and apply new techniques.

What You'll Gain

- Proven frameworks like the AGES and FACT models.
- Strategies to design learning that stays with participants.
- Tools to deliver engaging experiences, whatever the setting.

Elevate Your Approach to Learning Design

Join a select group of learning professionals for three sessions exploring the intersection of neuroscience and learning design. Gain practical insights to craft engaging, memorable, and scalable learning experiences.

Who Should Attend

This workshop is ideal for professionals seeking to enhance their approach to learning design and delivery, whether in corporate training, education, or organisational development.

Date and Location

28th May, 4th & 11th June
Virtual Workshop
