

This Is NLI

Using **science** to make organizations more human

- Pioneer in applying brain science to organizations since 1998
- Working with over 61 of the Fortune 100
- Operations in 24+ countries

Putting science to work ...

- Identify where research supplants conventional wisdom.
- Operationalize research to drive behavior and culture change.
- Identify the key habits needed to make desired behaviors manifest in everyday life.
- Drive habit formation following the science of learning.

... with theoretical and practical experience

Culture & Leadership

Diversity & Inclusion

Performance

- Map the principles that guide leadership, and shift habits to create new cultures.
- Create smarter teams by lifting inclusion, mitigating biases, and raising employee voices.
- Build feedback-rich cultures and lift the conversations that drive performance.

Simple, sticky ideas, supported by deep science.
